Full Stack Developer

TecNM / Instituto Tecnológico de Tehuacán, September 2018 - December 2018

Responsible for full stack development and database of the module 'didactic instrumentation' for use by all teachers of the National Technological Institute of Mexico.

Achievements:

Before the teachers made the didactic instrumentation in programs such as "word", following specific standards and formats, but now:

- Filling data is fast, intuitive and effective.
- At the end of the capture the teachers obtain the didactic instrumentation in a PDF complying with the norms and formats required and the confidence that everything they wrote and saved is in a database.
- The document once generated can be consulted or edited on the platform when and where they want from a web browser and with an internet connection.

Technologies used:

- PHP 7
- MariaDB
- Yii 2
- HTML5
- jQuery
- Bootstrap 4

Web Developer
