## CAREER SUMMARY

Software engineer with two years of experience in the backend part and frontend using PHP technology and its Codeigniter and Yii2 frameworks. Participating in information management projects in databases. I am willing to learn more and use other technologies especially in JavaScript, Python and Ruby.

## WORK EXPERIENCE

### Full Stack Developer

Grupo Salinas

March 2019 - At present

Java full stack developer in the company.

#### Description

Responsible for developing REST services and web portals for the management of the company.

#### Technologies used:

Java Spring boot Struts jQuery HTML5 JSP Vue.js

### Full Stack Developer

TecNM / Instituto Tecnológico de Tehuacán

September 2018 - December 2018

Responsible for full stack development and database of the module 'didactic instrumentation' for use by all teachers of the National Technological Institute of Mexico.

#### Achievements:

Before the teachers made the didactic instrumentation in programs such as "word", following specific standards and formats, but now:

- Filling data is fast, intuitive and effective.
- At the end of the capture the teachers obtain the didactic instrumentation in a PDF complying with the norms and formats required and the confidence that everything they wrote and saved is in a database.
- The document once generated can be consulted or edited on the platform when and where they want from a web browser and with an internet connection.

#### Technologies used:

PHP 7 Yii 2 jQuery MariaDB HTML5 Bootstrap 4

### Web Developer
